

\$1000 IN YOUR POCKET AND NO APPLICATION FEE ON HONDA PWC FINANCE THIS SUMMER

Making a splash on one of Honda's awesome AquaTrax Personal Watercraft (PWC) this summer is easier than ever.

Between now and March 31, 2008 customers who purchase a Honda PWC from an authorised dealer will receive an amazing \$1000 cash back (including GST).

And for those customers who prefer to spread their payments out over time, Honda are also offering a "no finance application fee" promotion to approved customers!

Both promotions apply to the entire high performance AquaTrax range including the one, two and three seater F12X GPS, F12X, F12, R12X and R12.

As the world-acknowledged leader in 4-stroke technology, Honda engineers have set the standard for combining high performance with low emissions in the latest generation of fuel-injected, four-cylinder, 1235cc, four-stroke PWC's.

Customer's interests are entirely catered for in the current line-up including craft for cruising, sport riding and even towing a skier or wakeboarder.

The normally aspirated trim engine, fitted to the AquaTrax F-12, makes 137 bhp. Add the intercooled turbocharger found on the F-12X and R-12X models, and Honda's new top-of-the-line watercraft ups the ante to an amazing 165 bhp!

The two-seater R-12X also introduces to sport PWCs a feature usually reserved for racing - an adjustable race-inspired trim system to control the attitude of the R-12X's bow.

Each craft features an abundance of creature comforts such as generous storage areas, easy-to-read instrumentation, quiet operation, and a surplus of torque.
